

YEAR OF MANUFACTURE

To determine the age of a generator set, locate the serial number then find the year under which the number fits in the charts below. Before 1936, blocks of numbers were reserved for the various models being built. Starting in 1936, however, serial numbers have been assigned in numerical sequence to all models as they are scheduled for production. The last serial number issued in the year is shown in the 1973-1936 chart. If a set has a serial number issued late in the year, it may not actually be completed until the following year. Because of this, the serial number determines the approximate year of manufacture only.

1973 - 1936

| YEAR-LAST SERIAL# |
|-------------------|-------------------|-------------------|-------------------|-------------------|-------------------|
| 1977 | 1970 335663 | 1963 252100 | 1956 205516 | 1949 141392 | 1942 62227 |
| 1976 - | 1969 321568 | 1962 244500 | 1955 197487 | 1948 132366 | 1941 52003 |
| 1975 - | 1968 307918 | 1961 237000 | 1954 189976 | 1947 123006 | 1940 46500 |
| 1974 - | 1967 295500 | 1960 230000 | 1953 180280 | 1946 122700 | 1939 39000 |
| 1973 407361 | 1966 285103 | 1959 223000 | 1952 171245 | 1945 114000 | 1938 37000 |
| --1972 -371140- | 1965 270200 | 1958 218300 | 1951 163495 | 1944 102237 | 1937 34250 |
| 1971 351748 | 1964 251000 | 1957 212200 | 1950 153315 | 1943 81097 | 1936 32377 |
