NATIONAL COMMITMENT

I want to make one thing unmistakably and indelibly clear to every department, every agency, every office, every employee of the Government of the United States.

Where there is an office or an officer in this Government, there must be equal opportunity, equal treatment, equal respect, equal service-- and equal support-- for all American citizens, regardless of race, color, sex, religion, or national origin.

Public service is a public trust. I, therefore, call upon every Federal employee to remember that he bears a high and solemn trust to the Constitution which guarantees this equality.

DEPARTMENT OF TRANSPORTATION

GENERAL TELEPHONE INFORMATION

REGIONAL TELEPHONE SYSTEM

TO MAKE INTEROFFICE CALLS dial the three digit extension number.

TO MAKE OUTSIDE CALLS dial "9" plus desired number.

TO TRANSFER OUTSIDE CALLS depress receiver hook several times and wait for operator.

FOR ASSISTANCE dial "0" (Operator).

FOR CONFERENCE CALLS:

Of not more than five participants dial "0" for Operator and give the names and extensions. The Operator will make the necessary connections manually on the switchboard.

Of not more than ten participants inform each party to dial "80" at a predetermined time; this procedure will place all participants on the automatic telephone conference and does not require the presence of an operator.

PLACE ALL LONG DISTANCE CALLS through Operator by dialing "0".

TO REPORT MALFUNCTIONING of telephone instruments dial "0" for Operator.

ALASKA TELEPHONE SWITCHING SYSTEM (ATSS)

This is a Department of Defense telephone switching system. The Alaska Telephone Switching System provides direct distance dialing between Department of Defense, Federal Aviation Administration, and other government agencies located throughout Alaska, as well as limited access to the Automatic Voice Operated Network (AUTOVON).

Telephone numbers of all FAA locations served by the ATSS are identified under a separate column titled "ATSS".

Most FAA locations served by ATSS must dial an access code to enter the switching system (ATSS) and prior to dialing other ATSS locations. Access codes may vary and must be obtained from the local DOD PBX serving the respective FAA location.

System assistance for dialing ATSS numbers, and establishing connections to non-dial-thru locations is provided at the system assistance switchboard. This service is provided by dialing the appropriate access code followed by three digit numbers as listed below:

Chief Operator (ATSS)	632
Assistance Operator	121
Information Operator	113
